Subject: Building permit/ blueprints

hello Carrie,

my name is Christopher Ripke, i am the president of a local non profit "People First of Nevada"

i was wondering if i could get the blueprints for bud beasley elementary school.

we are working on our sub committee and the investigation of seclusion rooms with in the schools.

A seclusion room exists in that school i would just like the blueprints to see if it was in the building plan when build. because some schools build

these rooms without the use of a proper building permit. would like to see if its in the blue prints or not.

thank you!

Dear Mr. Ripke,

Bud Beasley Elementary was built in 1994. The plans are on microfiche and there are approximately 93 pages of plans.

I am attaching a "floor plan" which most closely fits your request. It should give you a basic outline of all the rooms. However, there is no way we would be able to tell you what a room is being used for. Unless there is a change in the structure/plumbing/wiring, etc of a building, no permit would be required to change the use of a room. i.e. classroom into a library or office space.

There is no charge for this one plan, but if you need more, then I will have to charge you \$63/hour for research to pull and digitize additional pages. I did look through the other film and most of it contains electrical plans, roofing plans, mechanical, etc.

Permits for changes to the school can be located on the City of Sparks website. I have attached a link for your convenience.

Please let me know if I can be of further assistance.
