# Pharmacy Benefit Managers (PBMs) & Their Role in Drug Costs

Please join us for a webinar on Wednesday Oct 25th @ 4pm EDT as we provide an overview of how insurance companies use Pharmacy Benefit Managers (PBMs) – who they are, how they work, and their role in determining the cost of medicines in the United States.

Given the broad impact of PBMs on medication cost and access in the United States, every individual that is prescribed a medication is likely affected by PBM policies. Join the webinar to learn more about how PBMs impact healthcare and recent legislative activity on the federal level to bring more accountability and transparency to PBM practices.

## Guest Speaker:

**Jessica Nagro**, Deputy Vice President of  
Advocacy & Strategic Alliances at PhRMA
